

## Stòras Uibhist Fishing Report 2017

April started of cold and showery and continued for most of the month in this way which meant very few anglers have been out for any length of time. It's now the end of April and into May conditions for fishing have begun to warm up nicely.

With few anglers on the ground early May and conditions near perfect, Mr Longley enjoyed a lovely two days fishing Grogarry and West Ollay with more success on Grogarry with the best being 2.5lbs. Mr Crystal also fishing the week on a mix of Club lochs and estate and catching nice numbers of fish of Upper Bornish, Stilligarry and Hallan best fish from Stilligarry of just over 2lbs.

With more anglers on the ground as we moved into May some notable catches to date
